

Extreme Makeover Includes CableRail Railings

Feeney, Inc., in conjunction with their CableRail dealer Rivers Wood Products, donated 1/8" Standard CableRail Assemblies to the *Extreme Makeover: Home Edition* project benefitting the Rogers family in North Pole, Alaska. The stainless steel cables were used for the infill on the wood framed interior stairway railing to provide a more open feel and look to the stairway area.

Over 1000 volunteers from North Pole and other communities throughout the state of Alaska worked around the clock to construct the 4,800 square foot home in just 106 hours. The 13 member Rogers family had been living in a badly deteriorated 900 square foot home with faulty pipes, little insulation and a front door that wouldn't close properly, so the new home was a much needed and welcomed gift.

Extreme Makeover: Home Edition is a two-time Emmy Award-Winning ABC television show produced by Endemol USA, a division of Endemol Holding. The Rogers family project is episode #401, and it aired on July 22, 2007. Visit the photo gallery for this episode at <http://abc.go.com/primetime/xtremehome/>
