

Feeney, Inc. to Offer Continuing Education Session on Cable Railing at 2017 AIA Conference

OAKLAND, Calif. – April 14, 2017 – [Feeney, Inc.](#) will present a continuing education session titled “Cable Railing Assemblies: Prefabricated Kits and Custom Design Options” at the annual AIA Conference on Architecture, to be held in Orlando from April 27-29, 2017.

During the complementary, hour-long course, professionals will explore multiple aspects of cable railing, including cable railing benefits, design considerations, materials selection and how to properly prepare railing frames for cable tension loads.

“Because of its sleek, open look and ease of installation and maintenance, an increasing number of architects, designers and other building professionals are specifying stainless steel cable infill for their projects,” said Andrew Penny, vice president of marketing and advertising, Feeney, Inc. “In addition to offering strength and durability, cable railing can be used indoors or out, making it a highly versatile design option. Our continuing education course has been created to help professionals optimize their cable railing installations while providing their clients with beautiful, long-lasting railing solutions.”

Topics to be covered include:

- Horizontal cable infill and its advantages
- Frame design
- Prefabricated and custom assembly kits
- Installation specifications
- Special safety requirements

The course is scheduled for Friday, April 28 from 10:45 to 11:45 a.m. in CE Theater B at the Orlando Convention Center. Attendees will be eligible to receive 1 AIA LU/HSW hour. Conference visitors are also invited to stop by Feeney booth #1732, where a number of the company’s products will be on display.
