

Feeney, Inc. Debuts Pre-Drilled Stair Posts and Intermediate Pickets for DesignRail® System

Newest introductions reduce installation time and costs while increasing accuracy when installing cable railing infill on stairs

OAKLAND, Calif. – May 11, 2017 – [Feeney, Inc.](#), a leading manufacturer of high quality stainless steel and aluminum railing systems, has introduced pre-drilled stair posts and intermediate pickets for its DesignRail® Aluminum Railing System. Developed specifically to work with Feeney’s CableRail infill, the new posts and pickets eliminate the need for installers to drill holes for the cables in the field, saving time and money and avoiding potential errors.

“We’re always looking for ways to make installation of our products easier and more efficient,” said Andrew Penny, vice president of marketing and advertising, Feeney, Inc. “Our new pre-drilled posts and pickets enable installers to more quickly and accurately install Feeney railing systems on stairs, giving them confidence that the cable infill is installed properly while allowing them to optimize their time on the jobsite.”

Compatible with all DesignRail® Aluminum Railing top rail profiles, the pre-drilled stair posts and pickets feature slotted holes that are drilled to minimize the size of openings for a clean, aesthetically pleasing look while also maintaining angle flexibility. Pre-drilled posts are available for Base Mount, Stanchion Mount and Fascia Mount configurations. Three standard angle ranges and three standard railing heights are offered, with custom angles and heights also available.

Additionally, the posts and pickets include extra material at the top and bottom to facilitate convenient trimming once final post locations are determined – providing added versatility while in the field.

Pre-drilled components include: Intermediate Post, Threaded Terminal Post (bottom of stair), Quick-Connect® Post (top of stair) and Intermediate Picket. The posts and pickets can be used with any DesignRail® aluminum railing project using 1/8” CableRail infill on stairs.
