Feeney, Inc. Introduces New LED Post Accent Light

Feeney, Inc. continues to expand its selection of lighting systems for outdoor living spaces with its new LED Post Accent Light

OAKLAND, Calif. – Dec. 2015 – [Feeney, Inc.](#), a leading manufacturer of high quality stainless steel and aluminum railing systems, has introduced its LED Post Accent Light for the company’s DesignRail® system. The new accent light will debut at the 2016 International Builders’ Show (booth #1713), Jan. 19-21, 2016 in Las Vegas.

“As homeowners increasingly invest in their exterior living spaces, outdoor lighting systems have shifted from a trend product to a must-have,” says Andy Penny, vice president of marketing and advertising. “Feeney’s new LED Post Accent Light not only offers functionality for safety reasons, but also exhibits design appeal for all styles of architecture.”

The 24-volt LED Post Accent Light, featuring a durable, powder-coated finish that is color matched with Feeney DesignRail® Aluminum Railing Systems, attaches to the railing’s post face to create a beautiful down light. Its energy-efficient warm white LED bulbs are rated for up to 50,000 hours, and have a high color rendering index (CRI), for a truer representation of color. Feeney’s exclusive polycarbonate lens protects the bulbs from harsh weather elements and diffuses the light more evenly. As with other Feeney lighting products, the accent light is easy to install and is also compatible with third-party dimmers and switches.

“The new post accent light and our LED Rail Light Kits are a great combination”, says Penny. “This gives Feeney a well-rounded selection of lighting systems to complement our Aluminum Railing Systems, resulting in a more comprehensive package for our customers.”
