**STA-LOK® OFFERS STAINLESS STEEL ROD
ASSEMBLIES FOR A VARIETY OF STRUCTURAL AND
DECORATIVE PURPOSES**

*- Feeney distributes the Sta-Lok® high quality stainless steel rod system
in the U.S. for commercial and residential projects –*

OAKLAND, California, January 2009 – If you are looking for a low-maintenance alternative to traditional steel rod and wire rope rigging systems, then consider Sta-Lok® stainless steel rod assemblies, distributed in the U.S. by Feeney. All of the weather-tough rods and fittings are made from high-quality, high-strength, 316-grade stainless steel with a satin finish for durability and lasting beauty. One of the big benefits is their ability to support loads in either a tension or compression situation. These rods can be used in a variety of structural and decorative applications from glass curtain wall and door canopy supports to guardrail balusters and trellis infill grids.

“New and distinctive architectural designs require products that add to the finished detail elements and help set the projects apart,” said Andrew Penny, Vice President of marketing and advertising at Feeney. “This range of products fits well with our other versatile and long-lasting stainless steel products, marketed under our Feeney Architectural Products line. The rods are custom cut and threaded in our Oakland plant with the fittings manufactured in England. Our policy is to keep most fitting sizes in stock for fast order turnaround and delivery.”

Rods and components may be purchased individually or as complete, made-to-measure assemblies, ready to install. Assemblies come with left-hand and right-hand threaded Tension Fork end fittings affording easy adjustment and tensioning without the need for bulky in-line turnbuckles. Simply spin the rod to adjust length. Flats are machined onto each rod so that wrenches can grip without scratching the finish. Rods are available in 12-foot lengths and can be

coupled together with special Rod Connector fittings for extended lengths. The experienced Feeney staff is ready to assist with product selection and technical support.

Feeney Inc, based in Oakland, California, is a leading manufacturer of high quality stainless steel and aluminum products, marketed under their Feeney Architectural Products line. They celebrated their 60th anniversary in 2008. For more information and technical support, please call the Customer Service Hotline at 800-888-2418.
