CABLETRELLIS™ TRELLIS SYSTEMS ENHANCE ANY WALL, FENCE, OR LANDSCAPE

*- Feeney offers a line of trellises that combine simplicity, durability,
environmental integrity, and good looks -*

OAKLAND, California, January 2009 – Feeney, known for their CableRail™ and DesignRail® lines of architectural cable assemblies and aluminum railing systems, has developed two elegant and easy-to-install trellis system kits for use in residential and commercial settings: the wall mount *Somerset*™ trellis and the freestanding *Greenway*™ trellis. Each kit includes all of the frame, rod and cable components needed to build your trellis, which makes specifying, ordering and installing a breeze.

“We’ve drawn from our vast experience with aluminum extrusions and stainless steel cable, rods and fittings to create two unique trellis systems,” said Andrew Penny, Vice President of Marketing at Feeney. “Our goal was to develop simple and attractive designs that are easy to install, sold in ready-to-assemble kits, and made from environmentally friendly materials.”

The *Somerset*™ wall mounted kit is available in seven standard height packages (from 4 ft to 10 ft; 1 ft increments) that can be field trimmed to your exact height requirements. It consists of powder coated aluminum angle brackets top and bottom that screw or bolt to the wall face and support a grid of vertical cables and horizontal rods. Multiple kits can be mounted adjacent to one another to expand and fit any wall area.

The *Greenway*™ freestanding trellis is a 6-foot-high trellis panel kit made from 1-1/2” diameter powder coated aluminum tubing. The pre-cut tubing sections easily sleeve together into a framework that supports a cable and rod grid. The legs of the frame can either be set in compacted gravel or concrete footings, or they can be trimmed and fitted with optional surface

mount base plates. Panels can be combined in a variety of ways to create dramatic landscaping effects.

“*CableTrellis*[™] systems can be utilitarian, decorative and even artistic,” adds Mr. Penny. “The freestanding trellises covered with cascading greenery or fragrant flowers can make beautiful space-dividing screens, privacy barriers or sun shades while wall mounted displays can turn an otherwise stark wall or fence into a colorful, textured backdrop. Trellises can even be used to frame a lovely view, direct foot traffic or create a cool, relaxing retreat or entertaining area. And at season’s end when the plants recede and the structure takes center stage, *CableTrellis*[™] systems will continue to provide a beautiful accent to any landscape design.”

Feeney Inc, based in Oakland, California, is a leading manufacturer of high quality stainless steel and aluminum railing systems, marketed under the Feeney Architectural Products line. Feeney celebrated its 60th anniversary in 2008. For more information and technical support, please call the Customer Service Hotline at 800-888-2418.
