

CableRail by Feeney Plays Part in Multi Award Winning Home Remodel

November 2011

CG&S Design-Build of Austin TX took a 1950s era concrete home and created a beautiful second-floor addition that included a master suite and generously sized rooftop deck. Sleek stainless steel *CableRail* cables from Feeney, Inc. were used on the interior stair railings and exterior deck railings to complement the modern open design aesthetic and offer unimpaired views of Austin's beautiful downtown skyline. The project has won [*Professional Remodeler*](#) magazine's 2011 Project of the Year (category: addition over \$150,000) as well as [*Qualified Remodeler*](#) magazine's Master Design Awards 2011 (category: addition over \$100,000).
